

Internet Information System

- 1 Allow large level data to be easily **collected**
- 2 Allow all that data to be easily **Visualized** for better future planning
- 3 Registration of institutes on a national scale
- 4 Data collected can be mapped against social factors viz Population, Unemployment etc.
- 5 Data collected : **Location**, Basic Information, Disciplines, Seat Availability, Affiliation etc.

Collection

1. Name
2. Location
3. Disciplines
4. Seats in each
5. Website
6. (Year Of Start)
7. Contact

Visualization

1. Maps
2. Charts
3. Graphs
4. Tables
5. Export Data (xml)

Using

1. mySQL
2. PHP
3. Google Maps API
4. Apache/(any web server)
